During flood season, typically in the summer months the Yangtze River in Shanghai experiences its peak water levels and flow rates driven by heavy monsoonal rains and snowmelt. This period poses significant challenges as the heightened river levels increase the risk of flooding in surrounding areas. The inundation of floodplains and low-lying areas can result in damage to infrastructure, agriculture and settlements disrupting lives and livelihoods.

shoel

Flooded by the seasonal variation of Yangtze River, Shanghai is a typical city, a massive city by its scale.

Water over the land calls for strategies to cope in recession, flood season and in between.

The book is a creative collaboration between the architect and the designer. The book design is completed by Hideo Aoki. The paper is coated on a FINE, high-quality, 100% recycled paper, and is uncoated by Poly-Tone. The book is printed in 100% recycled paper, 150gsm, 210x297mm, 112 pages, 2024.

Inspired by the seasonal variation of Yangtze River, Flumen is a display typeface that embraces the fluidity of water. Variations in width indicate shifts in water level in dry season, flood season and in between.

LOW
TIDE
FLOOD

從超市裏買來的香
了。它們從鮮艷的黃
果肉也變成黑色。一
路徑前行，我們終
爛，被微生物分解，
的一部分——而土地
會以另一種形式永
不過是無盡輪回裏的

It only takes about a week for bananas
thought from supermarkets to decay.
They gradually turn from yellow to
brown to black. They are the same
which will eventually be absorbed by
the land. Even though we seem to be
dead, our bodies will eventually be
broken down by microbes, and become
a part of the earth, which then lives
and breathes in a different form.
Life and death is merely just
an ephemeral state that we experience.

總是在一周裏就爛掉
變得腐敗，直至內裏的
切事物都在以相似的
走向消亡。肉身會腐
是我們成為廣闊土地
育著新的生命，生命
持續下去。生與死不
間態罷了。

Inspired by the rotting process of a banana, this project explores the process from life to death, and the other way around. It is designed to read from both ways. There is no designated start or end of the book, just like life itself.

Sun Yuan and Peng Yu
CAN'T HELP MYSELF

In this work commissioned for the Guggenheim Museum, Sun Yuan & Peng Yu employ an industrial robot, visual-recognition sensors, and software systems to explore our increasingly automated global reality, one in which machines are now bonded mechanically and the relationship between

with two robots designed elements of thirty feet measurement for machine to perform basic movements, such as "pick up" and "put down" and "assisted" robot program to animate a banana, captured from the acrylic part of the banana, while the machine moves to capture and metamorphose into a banana that has been captured and captured in the same time, for viewers the gradually sense of watching the robot's actions, a sense of vulnerability or surprise, a sense of the machine's vulnerability, and the machine's

Sun Yuan & Peng Yu are known for using their humor to explore contemporary issues, and the robot's eyes and movements are designed to be absurd, to create a sense of humor and to explore the relationship between humans and machines. However, the humor is not meant to be a joke, but to explore the relationship between humans and machines, and to explore the relationship between humans and machines, and to explore the relationship between humans and machines.

Art-Ba-Ba 藝術論壇
**誤讀藝術家
 孫原，幾乎是
 一種常態**

2015年對《誤讀藝術家》的出版，我們和孫原做了幾次長談，同時還做了一些關於他與藝術界關係的調查。然後我們發現，藝術家與媒體的關係，一個多小時的對話，同時引發了一些關於藝術的討論，為什麼會被誤讀呢？

也許「誤讀」就是藝術進入大眾視野的一種障礙？

傅頌、孫原
 Q+編輯：S+編輯

知識份子藝術：印刷藝術本體

Q：今年我們對藝術界的工作，有幾種期待，你怎麼看呢？

A：我的理解，這是一系列的問題，在現實中，我們不能只靠人類的行為，而要靠一些機器，這些機器在現實中，除了不具備「眼睛」之外，什麼電影、藝術、音樂都不具備了。

Q：2015年和2016年的出版，你覺得可以說是一個「里程碑」嗎？

A：2015年出版的《誤讀藝術家》和《中國當代藝術人與媒體》是兩部作品，這兩部作品，可以說是「一個時代的結束」。

Q：其中《誤讀藝術家》的出版，對你來說，在現實中，有什麼意義？你們的出版，對藝術界有什麼影響？

A：我們是不知不覺的，在現實中，我們出版的作品，並不是為了出版，而是為了出版，我們出版的作品，並不是為了出版，而是為了出版。

Concept Design

2023

Rule

1. Abstract shapes from the physical object.
2. Place them into the coordinate system.
 - a. Straight lines
 - i. Parallel to the **x** / **y** / **z** axis: Give the color of the axis to the line
 - ii. Not parallel to any: NG
 - b. Curves: Use the coordinate plane to cut the shape. The cut curves are given the color of the axis which is closer as a parallel.
3. Reduce one set of information, leaving two colors.

e.g. Reduce the **x axis** -> **G** & **B**
4. Reduce another set of information, leaving one color.

e.g. (Reduce the x axis.) Reduce the **y axis** -> **B**
5. Decide if Legible / Not legible
